

## **US companies team up to offer US Biologics and Biosimilar expertise to Asian manufacturers and drug developers**

Stamford Bioprocess Technologies and Stason Pharmaceuticals announce their partnership to provide pharmaceuticals manufacturing and development expertise, in particular Biologic and Biosimilar Products and Product Development, to companies in Asia. Several products of interest are in the companies' pipeline. As part of this venture, earlier this week on September 5, 2011, Stamford was invited to present at the Taiwan Generic Pharmaceutical Association's Conference (supported by Taiwan's Ministry of Health) on Regulation and Development Strategy of Biosimilar Products in Taipei. Stamford's President and CEO, Qamar Zaidi, presented 'Tackling Biosimilars from a Business Perspective-Global Future of Biosimilars' and Senior Scientific Advisor Dr. Lou Bookbinder presented 'Developing Biosimilars- Technical Know-how, Quality, Safety, Efficacy'. Mr. Zaidi and Dr. Bookbinder also fielded questions as part of an in-depth Q & A session attended by key industry executives and TFDA officials. "This was an excellent opportunity for Stason and Stamford to let people know of our expertise in the area of Biosimilars and Biologics products and development. ", stated Stamford's CEO Mr. Zaidi. Mr. Harry Fan, CEO of Stason Pharmaceuticals, commented on the new partnership, "This partnership aims to leverage Stason's strong established relationships in Asia to enable both companies, Stamford and Stason, to offer Biologics expertise and products on a global level."

### About Stamford Bioprocess Technologies

Stamford Bioprocess Technologies is based in Orange County, Southern California specializing in Bioprocess Development, Characterization and Validation Consulting and Technical Services. With a 5,600 sq. ft. facility and knowledgeable staff experienced in developing and manufacturing numerous Biologic Therapeutic products, Stamford offers these services as an extension of an existing team or can fulfill the place of an entire product development department for a company looking to produce a Biologic product.
