

**Major Analytical Equipment**

Multiple Waters HPLC System (with UV, PDA, and IC and RI Detectors)

Agilent GC System 6890

Bechman and Shimadzu UV Spectrophotometers

Infrared Spectrophotometers

Multiple Dissolution Stations with Auto Sampler (USP Apparatus I, II, and III)

Various pH meters, hardness testers, friabilators, and torque testers (Tablet Micrometers)

Disintegration baths

Tap density tester

Powder flow testing apparatus

DSC

Polarimeter

Karl-Fisher Titrator

Sonic Sifter

Moisture Balance

Surface Analyzer

Colorimeter

Image Analyzer

Multiple stability chambers covering 25° C/60% RH, 30° C/65% RH, and 40° C/75% RH

Various ovens, vacuum ovens, and incubators

Various balances and scales
